This booklet contains information about the Skandia funds currently available through our products. The information is updated monthly.

Please note that past performance is not a guide to future performance. You should read Skandia's relevant product literature before considering any product or service. Please consult your financial adviser before making any investment decisions.

Skandia does not provide advice on selecting investments.

# fund statistics in our fund ranges

## Risk Evaluator

The Risk Evaluator is a tool provided by Skandia which compares the volatility of fund sectors. The sectors have been arranged in ascending order according to their volatility numbers, which have been calculated over five years, and the entire range has been divided into ten segments, each representing 10% of the range. The sectors have been placed into the relevant segment, depending on where their volatility numbers fall. Each segment has been colour-coded to represent the risk associated with each sector.

Sectors will only have a risk evaluator rating after 60 months of performance data has been collated. Sectors that do not have performance data to this length will not display a Risk Evaluator rating.

## Quartile rank

Quartile rank is a rating of performance on a scale of 1 to 4, where 1 is best and 4 is worst. The entire performance range of a sector is divided into 4, with each quartile rank corresponding to 25% of the range.

## Fund manager Annual Charge (AMC)

All fund managers make an AMC for investment management. These are typically between 1% and 1.75% a year.

## Total Expense Ratio (TER)

The Total Expense Ratio (shown for Life and Pension funds) represents the true cost of running a fund. It includes the fund AMC (which is shown for Skandia MultiFUNDS Limited fund links) as well as the depository and custodial charges, and audit, registration and compliance fees.

## OBSR Ratings

Ratings awarded are AAA, AA or A.

There are several key factors which lead to the final OBSR Rating determination. These are:

- Strength of investment process and length of time it has been in place.
- Continuity of investment personnel.
- Investment style that has proven durable over time.
- Clearly defined investment objectives.
- Strong and consistent past performance record.
- Favourable risk adjusted returns.

The OBSR Ratings are more focused towards qualitative appraisals.

## Citywire Ratings

The Citywire Ratings provide a totally objective statistical gauge of a fund manager's risk adjusted performance.

Citywire considers all managers who run actively managed retail funds, assigning ratings to managers who achieve or exceed demanding performance thresholds based on their 36 month risk records. Of the hundreds of active fund managers only 20% receive a rating.

AAA fund managers in the top 5%

AA fund managers in the top 6%-13%

A fund managers in the top 14%-20%

## Sector averages

Sector averages denote the average performance of all funds within that particular sector. Sector classifications are governed by the Association of British Insurers (ABI) for Life and Pension funds and by the Investment Management Association (IMA) for MultiISA and MultiFUND investments. The two bodies do not provide the same sectors. Our Royal Skandia fund range uses the sectors defined by Financial Express.

A new sector will only display sector averages after three months of performance data has been collated.

# how to use indicator

The Indicator provides UK investors with a 12-month stock market outlook from a selection of fund groups linked to Skandia. We provided the fund groups with an index as a benchmark for each sector and asked them how they think the index will perform over the next 12 months.

These views are not fund specific. We have asked the fund groups to provide an outlook for each sector as a whole.

## positive currency outlook

If the Indicator shows a positive view for the US\$, Euro or Yen, this represents a view of Sterling depreciating against that currency, which will have a positive impact on the returns from overseas investment.

### Example: £1 = YEN 100

You, as an investor, buy Japanese shares costing YEN 100. After buying your shares, Sterling depreciates to £1 = YEN 90, this means you only need YEN 90 to buy back your original £1. You have YEN 100 which, divided by the exchange rate of £1/YEN 90, actually gives you £1.11.

If the fund group view for Japanese equities is positive and their outlook for the £/YEN is positive, then the overall outlook for the UK investor into Japan is positive. This is because the positive currency outlook increases the returns to the investor from the equity investment.

## negative currency outlook

If the Indicator shows a negative view for the US\$, Euro or Yen, this represents a view of Sterling appreciating against that currency, which will have a negative impact on the returns from overseas investment.

### Example: £1 = YEN 100

You, as an investor, buy Japanese shares costing YEN 100. After buying your shares, Sterling appreciates to £1 = YEN 110, this means you will need YEN 110 to buy back your original £1. You have YEN 100 which, divided by the exchange rate of £1/YEN 110, actually gives you £0.91.

If the fund group view for Japanese equities is positive but their outlook for the £/YEN is negative, then the UK investor would need to exercise a degree of caution when considering the Japanese market. This is because currency movements could adversely affect the positive equity returns.

## indicator categories

The outlook provided by the fund group for equities ignores the effect that currency movements can have on the market. For example, if the fund group believes the US outlook is positive, but believes the strength of Sterling will be a deterrent for UK investors, they will still show a positive outlook for the US market.

The outlooks for equities, bonds and property relate to the specific indices shown in the 'benchmarks and market movements' table below the indicator grid. The performance information shown in this table is calculated in Sterling terms.

The currency outlook provides an outlook for Sterling-based investors.

## outlook guidelines

### ▲ a positive outlook

the fund group believes the index they are using as a benchmark will rise in excess of 5% over the next 12 months.

### □ a neutral outlook

the fund group believes the index they are using as a benchmark will have either a positive or negative movement of between 0% and 5%.

### ● a negative outlook

the fund group believes the index they are using as a benchmark will fall in excess of 5% over the next 12 months.

These are Investment House views and are not fund-specific.

## the guaranteed pension fund

### guaranteed pension fund bonus announcement as at 1 February 2010

	Monthly bonus rates
Bonus rate on contribution units	0.0000%
Bonus rate on bonus units	0.0000%
Additional bonus	0.0000%

Due to the continued uncertainty experienced by the fixed interest and equity markets, the Fund is currently experiencing what we consider to be abnormal or extreme conditions. Bonus rates since April 2008 have been reduced to take account of this. For January, bonus rates have been set to zero.

Further information, including historical bonus rates, is available on the Skandia website. Investors should be aware that the value of the investment may fall as well as rise, although units in the Guaranteed Pension Fund have their value guaranteed at a pre-selected date. Bonuses are calculated after deducting an annual management charge of 1.1%. A discount may apply if units are redeemed prior to the Selected Guarantee Date.

## risk-rating with precision

Spectrum is an innovative range of risk-rated funds that bring greater precision to the management of your investment journey by matching the appropriate portfolio to an acceptable level of risk.

It works by using the pioneering Skandia Risk Profiler to determine an investor's appetite for risk by way of a risk 'score', then matching that directly to the strictly risk-controlled Spectrum Fund that has the most suitable risk-return characteristics.

The Spectrum solution offers a range of six funds, designed to meet the requirements of investors with a Skandia risk level of 3 to 8. Historically more than 95% of investors fall within risk profiles 3-8, which is why the Spectrum Funds have been built to match these profiles. Each fund will have an asset allocation designed to maximise the expected returns for a given level of risk.

For more information about this range of funds, please speak with your financial adviser.

## matching portfolio risk and client risk tolerance

Each fund within the Spectrum range aims to deliver the highest mathematically expected return for its given level of risk, based on the major asset classes. Having established the expected outcomes for all the combinations of assets, a line can be drawn to join up each of the 'optimal' portfolios at each risk level; this line is the Efficient Frontier.

# skandia deposit fund

all information as at 3 February 2010

The aim of the Skandia Deposit Fund is to provide a return, before charges and taxation, equivalent to the sterling three-month money market rates. The Skandia Deposit Fund is a unitised fund (not a cash account or facility) that is only available to investors in Skandia's life and pension policies (Skandia Life Assurance Company).

The Skandia Deposit Fund invests in a portfolio of accounts held in high-quality, approved credit institutions, focusing on risk control via a blend of term cash deposits. The Fund may also invest in a diversified portfolio of high-quality sterling money market fund assets, where this is required to fulfil the objectives of liquidity, safety of capital and stability of return. The Skandia Deposit Fund is a unitised fund (not a cash account or facility) that is only available to investors in Skandia's life and pension policies.

The Fund currently has a zero total expense ratio, which means that the Fund has no management charges. The Skandia investment policy for the Fund is centred around the financial institutions themselves and is subject to specific investment limits. The Skandia Deposit Fund is invested with UK banks and building societies that can call on the Government support being offered, and additionally invests with Irish banks where depositors' funds are being guaranteed by the Irish Government until September 2010.

## financial institution selection

To qualify for inclusion in the Skandia Deposit Fund the following criteria are used:

- Deposit holders must have a Fitch or Standard & Poor's credit rating of at least A, at the time of a deposit being placed with them.
- Subsequent changes in a deposit holder's credit rating, below A, will trigger reassessment of individual deposits with the deposit holder at the relevant deposit maturity date.
- The deposit holders must be UK-based or guaranteed by the Irish Government.
- Deposits made with deposit holders meeting these criteria are all denominated in sterling, with no exposure to foreign exchange risk.

## investment limits

The amount invested with an individual counterparty is restricted in relation to:

- The type of institution (bank/building society/other institution).
- The credit rating of the institution.
- The size of assets and/or capital and reserves of the institution.
- The overall fund value.

Investment ranges from 2.5% to 10% of the total fund value depending upon the criteria set out.

## fund facts

Fund composition

Fitch Rating

AA	1%
AA-	65%
A+	14%
A	20%

## top ten financial institutions

Institution	% of fund
Bank of Scotland	10%
Barclays	8%
Ulster	8%
Nationwide	8%
Alliance & Leicester	8%
RBS	8%
Leeds & Holbeck	8%
Clydesdale	7%
Santander	7%
Coventry	7%

## deposit maturity profile

The Fund is managed to provide a level of liquidity to meet policyholder demands, with a proportion of the fund maturing each week. The average maturity period is less than ten months, with a maximum duration of two years.

Term	% of fund
Immediate	23%
1 month	9%
2 months	9%
3 months	6%
>3 months*	53%
Total	100%

\* Deposits greater than three months are fixed for a maximum period of two years. The interest rates these deposits attract are renewed every three months in line with three-month LIBOR at the date of renewal.

Risk Evaluator

Percentage growth and quartile ranks calculated to 29 January

Annual performance % over one year to end January

## Skandia

Skandia Life makes use of the skills of its sister company Skandia Investment Management Ltd (SIML) to help it select and monitor investment managers within this range. The funds are managed by Skandia Life and are separate to the OEIC and Unit Trust funds offered by SIML, although they may be invested wholly, or partially through these funds.

# enhanced allocation bond funds

EAB funds are only available to investors in the Skandia Enhanced Allocation Bond. The fund range for this product is restricted to these funds only. The quartile ranks for the EAB Funds relate to each fund's relevant sector. The OBSR ratings relate to the underlying Unit Trust/OEIC; the Citywire ratings relate to the fund manager individual managing the underlying Unit Trust/OEIC.

	Percentage growth and quartile ranks calculated to 29 January										Annual performance % over one year to end January					TER	OBSR Fund Rating	Citywire Rating

¶ This fund invests in zero dividend preference shares.

<sup>1</sup> The fund manager may apply a Performance Related Fee and so the figure shown under the TER is only indicative of the charges which will be incurred. For more detailed information please refer to the relevant Fund Factsheet.

<sup>2</sup> Multi-Manager Fund.

Source for all performance information and Crown Ratings: Financial Express Limited, bid to bid, in Sterling, with net income reinvested back into the fund.

Investors should be aware that unit prices and the income from units may fall as well as rise and that **past performance is not a guide to the future.**

Where a fund invests in securities designated in a different currency to the fund, or where an underlying fund is denominated in a different currency, investments may rise and fall purely as a result of exchange rate fluctuations.

Please note the volatility of individual funds may be significantly higher or significantly lower than the volatility of the sectors into which the funds are classified.

Sector classifications are governed by Financial Express.

The TER figures quoted exclude any product charge which is reflected in the pricing of the fund.

Funds denoted by (SDB) are only available from the outset to investors in the Skandia Distribution Bond which must be 100% invested in this sector.

For more information regarding the statistics shown in our fund ranges please see the Fund News page.

This Financial Express sourced information is provided to you by Skandia UK Group and is used at your own risk. Financial Express take care to ensure that the information provided is correct. Neither Financial Express Limited or Skandia UK Group warrants, represents nor guarantees the contents of the information, nor do they accept any responsibility for error, inaccuracies, omissions or any inconsistencies herein.

Citywire Ratings: Source & Copyright: Citywire Financial Publishers Limited. The manager's Citywire Fund Manager rating is based on their 3 year risk adjusted performance. More information at [www.citywire.co.uk](http://www.citywire.co.uk)

OBSR Ratings: Source and copyright Old Broad Street Research Limited.

Skandia Life Assurance Company Limited is registered in England & Wales under number 1363932. Registered Office at Skandia House, Portland Terrace, Southampton SO14 7EJ, United Kingdom.

Authorised and regulated by the Financial Services Authority with FSA register number 110462. VAT number 386 1301 59.

The performance figures for Skandia Life include all external fund management fees the life company's Annual Management Charge, but do not include any other product charges. All Skandia products are subject to their own charges as well as those reflected in the unit prices. Fund performance figures shown are not therefore an indication of the performance of any particular product.

For MultiSA the performance does not allow for tax reclaims that have been available at various times in the past.

For pension funds investing in UK equities the performance before 6 April 1997 reflects the fact that they benefited from a tax credit on UK dividends of 20% which is no longer available.

For Skandia Life funds invested in unit trusts or OEICs, the performance of the Skandia fund will not mirror the performance of the underlying fund because of product charges, taxation adjustments (where appropriate) and the life company investment process.

Where a fund invests in securities designated in a different currency to the fund, or where an underlying fund is denominated in a different currency, investments may rise and fall purely as a result of exchange rate fluctuations.

Special risks apply to emerging market funds in addition to the normal risks of investing in securities. Their prices may fluctuate considerably, and local dealing restrictions may make some securities illiquid. Investment in these funds should be regarded as long term in nature and is only suitable for investors who understand the risks involved.

The inclusion of any particular fund in our fund ranges does not imply that it is suitable for a particular investor. Skandia does not provide advice on selecting investments - investors should consult their financial adviser on the merits of any particular investment.

The Financial Express sourced information is provided to you by Skandia UK Group and is used at your own risk. Financial Express take care to ensure that the information provided is correct. Neither Financial Express Limited or Skandia UK Group warrants, represents nor guarantees the contents of the information, nor do they accept any responsibility for error, inaccuracies, omissions or any inconsistencies herein.

Units prices may fall as well as rise.

**You should note that past performance is not a guide to future performance.**
