

# fund statistics in informer

## Fund Risk Number

You are familiar with the Risk Evaluator – telling you the volatility of sectors. The Fund Risk Number takes this idea and applies it to individual funds.

As the universe for Fund Risk and Sector Risk numbers is so different, as shown on the graph below, you should not seek to compare one to the other. By virtue of being grouped averages, the spread of sector volatilities will be compacted, whereas an individual fund may be some way from the average, as highlighted on the scale below.

The Skandia Fund Risk Number has been calculated by taking the volatility values of an entire fund universe and arranging them in ascending order. The ordered volatility range has subsequently been divided into ten segments, each representing 10% of the range. The funds have been placed into the relevant segment, depending on where their volatility numbers fall. The fund risk number will not be shown for funds with less than five years of performance history.

## Quartile rank

Quartile rank is a rating of performance on a scale of 1 to 4, where 1 is best and 4 is worst. The entire performance range of a sector is divided into 4, with each quartile rank corresponding to 25% of the range.

## Total Expense Ratio (TER)

The Total Expense Ratio (shown for Life and Pension funds) represents the true cost of running a fund. It includes the fund AMC (which is shown for Skandia Investment Solutions funds) as well as the depository and custodial charges, and audit, registration and compliance fees.

## OBSR Ratings

Ratings awarded are AAA, AA or A. There are several key factors which lead to the final OBSR Rating determination. These are:

- Strength of investment process and length of time it has been in place.
- Continuity of investment personnel.
- Investment style that has proven durable over time.
- Clearly defined investment objectives.
- Strong and consistent past performance record.
- Favourable risk adjusted returns.

The OBSR Ratings are more focused towards qualitative appraisals.

## Sector averages

Sector averages denote the average performance of all funds within that particular sector. Sector classifications are governed by Financial Express.

A new sector will only display sector averages after three months of performance data has been collated.

## Skandia sector

Skandia sectors mirror the asset classes used with the online investment tools. Please note a fund's Skandia sector may not always align with its IMA sector. Abbreviations for these sectors are listed within the fund performance statistics to help when searching for funds on the online investment tools. A key for these abbreviations is detailed below.

- EMK – Emerging Markets
- IFI – International Fixed Interest
- NAM – North American
- EUR – European excluding UK
- UFI – UK Fixed Interest
- PRO – Property
- FEX – Far East excluding Japan
- MGD – Managed
- UKE – UK Equity
- JAP – Japan
- CMM – Cash/Money Market
- GSP – Global Specialist

## Citywire Ratings

Citywire considers all managers who run actively managed retail funds, assigning ratings to managers who achieve or exceed demanding performance thresholds based on their 36-month risk records. Of the hundreds of active fund managers only 20% receive a rating.

- AAA fund managers in the top 5%
- AA fund managers in the top 6%-13%
- A fund managers in the top 14%-20%

## Skandia comments:

The Skandia range of Spectrum Funds continues to prove popular and is approaching funds under management of over £500 million. This demonstrates huge demand for risk targeted funds from financial advisers and their clients, making Spectrum one of the most successful MultiManager fund launches over the past year in terms of inflows. Despite experiencing a period of extreme stock market volatility during their first year, all six of the funds have performed as they were designed to do.

### how the funds work

Spectrum is an innovative range of risk-rated funds that bring greater precision to the management of your clients' investment journey by matching the appropriate portfolio to an acceptable level of risk.

It works by using the pioneering Skandia Risk Profiler, available through SkandiaView or Skandia Investment Solutions, to determine an investor's appetite for risk by way of a risk 'score', then matching that directly to the strictly risk-controlled Spectrum Fund that has the most suitable risk-return characteristics.

The Spectrum solution offers a range of six funds, designed to meet the requirements of investors with a Skandia risk level of 3 to 8. Historically more than 95% of investors fall within risk profiles 3-8, which is why the Spectrum Funds have been built to match these profiles. Each fund will have an asset allocation designed to maximise the expected returns for a given level of risk.

## spectrum asset allocations

Skandia Spectrum 3

Skandia Spectrum 4

Skandia Spectrum 5

Skandia Spectrum 6

Skandia Spectrum 7

Skandia Spectrum 8

## matching portfolio risk and client risk tolerance

Each fund within the Spectrum range aims to deliver the highest mathematically expected return for its given level of risk, based on the major asset classes. Having established the expected outcomes for all the combinations of assets, a line can be drawn to join up each of the 'optimal' portfolios at each risk level; this line is the Efficient Frontier.

Please view 'the Skandia Spectrum Funds - optimised asset allocation' for further details.

For further details, the financial adviser brochure and supporting literature, please contact your Skandia consultant or visit our literature library at [www.skandia.co.uk/fasite/spectrum](http://www.skandia.co.uk/fasite/spectrum)

# skandia deposit fund

all information as at 4 March 2010

The aim of the Skandia Deposit Fund is to provide a return, before charges and taxation, equivalent to the sterling three-month money market rates. The Skandia Deposit Fund is a unitised fund (not a cash account or facility) that is only available to investors in Skandia's life and pension policies (Skandia Life Assurance Company).

The Skandia Deposit Fund invests in a portfolio of accounts held in high-quality, approved credit institutions, focusing on risk control via a blend of term cash deposits. The Fund may also invest in a diversified portfolio of high-quality sterling money market fund assets, where this is required to fulfil the objectives of liquidity, safety of capital and stability of return. The Skandia Deposit Fund is a unitised fund (not a cash account or facility) that is only available to investors in Skandia's life and pension policies.

The Fund currently has a zero total expense ratio, which means that the Fund has no management charges. The Skandia investment policy for the Fund is centred around the financial institutions themselves and is subject to specific investment limits. The Skandia Deposit Fund is invested with UK banks and building societies that can call on the Government support being offered, and additionally invests with Irish banks where depositors' funds are being guaranteed by the Irish Government until September 2010.

## financial institution selection

To qualify for inclusion in the Skandia Deposit Fund the following criteria are used:

- Deposit holders must have a Fitch or Standard & Poor's credit rating of at least A, at the time of a deposit being placed with them.
- Subsequent changes in a deposit holder's credit rating, below A, will trigger reassessment of individual deposits with the deposit holder at the relevant deposit maturity date.
- The deposit holders must be UK-based or guaranteed by the Irish Government.
- Deposits made with deposit holders meeting these criteria are all denominated in sterling, with no exposure to foreign exchange risk.

## investment limits

The amount invested with an individual counterparty is restricted in relation to:

- The type of institution (bank/building society/other institution).
- The credit rating of the institution.
- The size of assets and/or capital and reserves of the institution.
- The overall fund value.

Investment ranges from 2.5% to 10% of the total fund value depending upon the criteria set out.

## fund facts

Fund composition

Fitch Rating

AA	1%
AA-	64%
A+	13%
A	22%

## top ten financial institutions

Institution	% of fund
Leeds & Holbeck	9%
Clydesdale	8%
Barclays	8%
Coventry	8%
Nationwide	8%
Alliance & Leicester	8%
Bank of Scotland	7%
Ulster	7%
RBS	7%
Santander UK plc	6%

## deposit maturity profile

The Fund is managed to provide a level of liquidity to meet policyholder demands, with a proportion of the fund maturing each week. The average maturity period is less than ten months, with a maximum duration of two years.

Term	% of fund
Immediate	21%
1 month	10%
2 months	6%
3 months	10%
>3 months*	53%
Total	100%

\* Deposits greater than three months are fixed for a maximum period of two years. The interest rates these deposits attract are renewed every three months in line with three-month LIBOR at the date of renewal.

# skandia risk evaluator

## life funds

### Risk Evaluator

The Risk Evaluator is a tool provided by Skandia which compares the volatility of fund sectors. The sectors have been arranged in ascending order according to their volatility numbers, which have been calculated over five years, and the entire range has been divided into ten segments. The sectors have been placed into the relevant segment, depending on where their volatility numbers fall. Each segment has been colour-coded to represent the risk associated with each sector.

Sectors will only have a risk evaluator rating after 60 months of performance data has been collated. Sectors that do not have performance data to this length will not display a risk evaluator rating.

Life Sectors – maximum quarterly gains and losses ordered by sector volatility

Past performance is not a guide to future performance.

Certain sectors are not rated for risk within the Risk Evaluator. This is because either the member funds do not have sufficient performance history to calculate the sector risk rating or the nature of the sector is too diverse to justify a comparison with other sectors. These sectors will be listed at the end of the relevant section within the performance statistics.

Use the Skandia Risk Evaluator to compare the volatility of fund sectors. All data is taken as at 31/12/2009. Source: Financial Express Limited, bid to bid, in Sterling, with net income reinvested back into the fund.

Volatility is taken to be the speed and magnitude of price changes of a security measured over a period of time. A price that moves frequently by a significant margin will be considered to have a high degree of volatility. For each sector you can also see the best and worst quarterly performance\* experienced over the last five years.

\*The maximum gain and loss is calculated by taking the sector average for each quarter over the five-year period, and selecting the highest and lowest returns achieved during that period. They are not based on the maximum gain/loss of the individual funds. Companies in the Skandia UK Group do not provide advice on the selection of investments and cannot accept any responsibility for losses which may arise as a consequence of actions taken after using Skandia Risk Evaluator, nor do they accept any liability for the investment decisions of investors, nor for any loss arising therefrom.

The Risk Evaluator chart will be updated quarterly as the month on month changes in risk order, Maximum Gain and Maximum Loss figures, which are calculated over five years, are likely to be insignificant.

Please note the volatility of individual funds may be significantly higher or significantly lower than the volatility of the sectors into which the funds are classified.

# enhanced allocation bond funds

EAB funds are only available to investors in the Skandia Enhanced Allocation Bond. The fund range for this product is restricted to these funds only. The quartile ranks for the EAB Funds relate to each fund's relevant sector. The OBSR ratings relate to the underlying Unit Trust/OEIC; the Citywire ratings relate to the fund manager individual managing the underlying Unit Trust/OEIC.

¶ This fund invests in zero dividend preference shares.

<sup>1</sup> The fund manager may apply a Performance Related Fee and so the figure shown under the TER is only indicative of the charges which will be incurred. For more detailed information please refer to the relevant Fund Factsheet.

<sup>2</sup> Multi-Manager Fund.

Source for all performance information and Crown Ratings: Financial Express Limited, bid to bid, in Sterling, with net income reinvested back into the fund.

Investors should be aware that unit prices and the income from units may fall as well as rise and that **past performance is not a guide to the future**.

Where a fund invests in securities designated in a different currency to the fund, or where an underlying fund is denominated in a different currency, investments may rise and fall purely as a result of exchange rate fluctuations.

Please note the volatility of individual funds may be significantly higher or significantly lower than the volatility of the sectors into which the funds are classified.

Sector classifications are governed by Financial Express.

The TER figures quoted exclude any product charge which is reflected in the pricing of the fund.

Funds denoted by (SDB) are only available from the outset to investors in the Skandia Distribution Bond which must be 100% invested in this sector.

For more information regarding the statistics shown in *informer* please see the Fund News page.
